Preventive Medication List

Introduction

In addition to a healthy lifestyle, preventive medications are important in helping people avoid many types of illnesses and complications from illnesses. This book contains a list of the most commonly prescribed preventive medications. It does not include all conditions that may be prevented with medications. The medications listed serve to maintain a person's health status and to avoid acute complications. This list is not all-inclusive and is subject to change.

Important facts about this benefit

- This benefit is for use with a qualified health savings account plan.
- Please refer to your plan documents for coverage on the selected products. Quantity limits, step therapy, prior authorizations and other coverage limitations may apply.
- Quantities are limited to a maximum 3-month supply per fill.
- Tier 3 medications listed on the Security Health Plan Formulary will not be routinely covered.
- If a generic equivalent product is available, the originator brand medication will not be covered (Example: simvastatin is covered, ZOCOR is not).

The covered preventive medications are divided into medication categories. The listed medications in the medication categories include those which are always prescribed for prevention and those which are sometimes prescribed for prevention. Medications used for treatment of an existing condition are typically not covered under the preventive prescription drug benefit.

Note: Benefits vary by plan. Please refer to your Plan documents for information specific to your coverage.

Notice of nondiscrimination

Discrimination is against the law

Security Health Plan of Wisconsin, Inc., complies with applicable Federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability, or sex. Security Health Plan of Wisconsin, Inc. does not exclude people or treat them differently because of race, color, national origin, age, disability or sex.
